EXPERIENCE

Erasmus +

Creating a website to manage all the activities that are hosted by the students of a college.

Front-end: HTML, CSS, BootStrap, JavaScript

It was a responsive one page website with a sidebar and a feed. The feed was filled with posts(you could apply a filter or search from the sidebar).

Back-end: PHP, MySQL

It required a database with a few tables for users, posts and a couple more; register feature, login feature, user privileges, post, edit post, search, user privileges.

03/2016 – 04/2016

Karlsruhe, Germany
